Gloucester Hires New Director of Information Technology & GIS

Gloucester County Administrator, J. Brent Fedors announces the hiring of Mr. Rich Erwin as the new Director of Information Technology & Geographic Information Systems. Mr Erwin will report for his first day with Gloucester County on February 1, 2017.

Mr. Erwin was employed previously as a manager of information technology operations for a private business concern that served five companies in Virginia. He has nearly twenty-five (25) years of proven performance with Northrup Grumman serving as a technology and engineering manager, systems engineer, software developer and process and quality manager. His duties included working with the Department of Defense in a wide range of assignments managing quality assurance for multiple multi-million dollar programs ranging from \$10-600 million. As part of his responsibilities, Mr. Erwin implemented quality management systems for multiple Department of Defense programs. As a software and systems engineer, Mr. Erwin has experience in design, code and application support.

“I look forward to working with this team. Building on a strong foundation with a forward-looking vision creates an exciting combination of opportunities for us all. I am truly humbled and honored to contribute to Gloucester County’s technical landscape and give back to this fantastic area in any way I can,” states Mr. Erwin. Mr. Erwin will lead a team of eight information technology and three GIS staff.

Gloucester County Administrator J. Brent Fedors shares, “I am excited to have Mr. Erwin join the Gloucester County team. I believe that he has the right combination of leadership, technical knowledge and cultural fit that we have been looking for, and will be a great asset to our community.” The annual salary for the position is \$95,000.
