Public Comment Sought on FY20-24 Capital Improvement Requests

The 5-Year (FY2020-FY2024) Capital Improvement Plan Requests document is now available for public review and comment on the Gloucester County website (gloucesterva.info) with hardcopies available at both public libraries and in the departments of Finance and County Administration, located in County Office Building One at 6467 Main Street.

The Capital Improvement Plan (CIP) is one of the most significant planning processes for Gloucester County and Gloucester County Public Schools. The plan identifies capital needs over a specified period (5-year) timeframe and is a planning tool for major facility and infrastructure investments. It sets forth future needs and priorities with anticipated funding sources, growth and the community's ability to pay. It serves as a "blueprint" for the future of the county, schools and community and is an important tool for ensuring efficient use of limited financial resources.

The public is invited to review the CIP Requests document and provide input through August 31, 2018 via the county website or by calling the Department of Finance at 693-6927 or sending comments via mail to stinsley@gloucesterva.info.
